Abstract (en)
[origin: EP2436602A1] The device (1) has a conveyor for dosing the bulk goods (2), a measuring device for measuring a measuring parameter and a receiving device (20) for receiving of a container, particularly a bag (22). The conveyor has an outlet (12) for bulk goods. The receiving device and the outlet are positioned relative to each other in a filler opening (23) of the container while dosing the bulk goods depending on the measuring parameter. An independent claim is also included for a method for dosing, particularly compacting the bulk goods.
