Abstract (en)  
[origin: WO2012059173A1] The invention relates to a furniture fitting for a movable furniture part, in particular for driving a flap (13), a door, or a drawer, wherein the furniture fitting (11) has a first support arm (19) and a second support arm (20), which each can be supported at one end on a furniture body (12) of a piece (10) of furniture or on a fitting part (23) that can be fastened to the furniture body (12), so as to be pivotable about first and second body-side pivot axes (21, 22), and at the other end on the movable furniture part or on a retaining part (26) that can be fastened to the movable furniture part, so as to be pivotable about first and second furniture-part-side pivot axes (24, 25), wherein three additional connecting joints (29, 30, 40) are arranged on the two support arms (19, 20), so that in total a seven-joint arrangement is formed. The seven-joint arrangement is designed in such a way that, when the furniture fitting (11) is installed on the piece (10) of furniture, at least two of the three connecting joints (29, 30) are in the furniture body (12) in a closed position of the movable furniture part and are pivoted out of the furniture body (12) when the movable furniture part is opened, so that said connecting joints are outside the furniture body in an open position of the movable furniture part.
