Abstract (en)  
[origin: WO2012041460A1] The invention relates to a goods shelf glazing having swing doors (1) that are pivotally fixed to a goods shelf by way of rotational joints (6). The goods shelf glazing is characterised in that the rotational joints (6) are fixed to the goods shelf so as to be releasable, movable and lockable in place. The rotational joints (6) are preferably fixed to at least one supporting arrangement (5, 7-10), which is movably guided on or in at least one guide rail (2) so as to be lockable in place, fixable and releasable. Rotational joints (6) of two adjacent swing doors (1) can be fixed to a supporting arrangement (5, 7-10).
