Abstract (en)
[origin: WO2012041472A1] The invention relates to a compressor comprising a first compartment (3) which houses an electric motor and is separated by a wall (8) from a second compartment (4) which houses a control device for the electric motor connected to the motor by an electrical connector 11, the electrical connector (11) comprising a plurality of terminals (12) connected to a plurality of connection elements (13) insulated from the first compartment (3) by an insulating means (14), characterized in that it comprises a securing means (28) between the insulating means (14) and the wall (8), the securing means (28) being operable from the first compartment (3).
