Abstract (en)  
[origin: WO2012041778A1] The present invention relates to a cross connector for an electrical housing or for an arrangement comprising electrical housings of this kind, in particular for a terminal block arrangement, on which cross connector at least two contact connections, which are in the form of a plug or socket, are provided or can be provided, wherein the cross connector has means for providing a marking and/or markings, wherein in each case either a contact connection which is arranged on the cross connector and/or a contact connection which is not arranged on the cross connector is marked by all the markings which are provided on the cross connector. The present invention relates to a cross connector, in particular according to the invention, which has a viewing region through which the contact connections are visible. The present invention also relates to an electrical housing or to an arrangement comprising electrical housings of this kind, in particular to a terminal block arrangement, having at least two receptacles for receiving a contact connection of a cross connector, in particular according to the invention. The present invention also relates to a marking tool for marking a cross connector according to the invention. The present invention also relates to a method for identifying contact connections which are provided on a cross connector for an electrical housing or for an arrangement comprising electrical housings of this kind.
