Abstract (en)

[origin: EP2622985A1] There is provided a slide fastener capable of giving decorativeness to an end stop. The slide fastener includes a pair of fastener tapes (20), a pair of fastener element rows (30) respectively arranged along opposing tape-side edge portions (20a) of the pair of fastener tapes (20), the pair of fastener element rows (30) including a plurality of fastener elements (31), a slider configured to engage and disengage the pair of fastener element rows (30), end stops (50, 70) configured to stop sliding movement of the slider, and a decoration member (60) mounted on the end stops (50, 70). The end stop includes a tape accommodation portion (51) for accommodating the fastener tape (20) therein and an engaged portion (52) for engaging the decoration member (60) therewith. The decoration member (60) includes a body portion (61) which is decorated and an engaging portion (62) provided on a back surface of the body portion (61) and configured to be engaged with the engaged portion (52).
