Abstract (en)
[origin: EP2622986A2] The straightener (100) has an electrical heating plate that is provided with two-dimensional electrical resistance structure (170-1). An outside of heating plate is arranged in electrical circuit (200). A main electrical contact structure (190-1) different from auxiliary electrical contact structure (190-2) is provided, and contact structures are arranged on heating plate, such that electrically conductive connection of resistance structure with electrical circuit is created through an electrical feed line (210).
