Abstract (en)  
[origin: EP2623007A2] The apparatus (1) has a device body (3), a suction head (4) and a connecting part (5) for connecting the body and the suction head. A low pressure unit (6) is arranged in the body for generating low pressure, where air, dirt and/or dust particles are sucked by the suction head and the connection part by using the low pressure unit. A container (8) i.e. bag, is provided for liquid disinfectant (11) i.e. byotrol, that is sprayed in an area in front of the suction head or in the suction head or around the suction head by using a spraying unit (9). A rolling unit is arranged at the suction head.
