Abstract (en)
A washing machine (1) includes a drum (20), a water supply device (40), and a controller (120). The drum (20) accommodates laundry, and the water supply device (40) supplies water to the inside of the drum (20). The controller (120) controls supply of water so that water is supplied into the drum (20) from when rotational speed of the drum (20) reaches a first predetermined speed, is decelerated and reaches a second predetermined speed, to when the rotational speed of the drum (20) reaches to a third speed more than the second speed and less than the first speed, in a spin-drying cycle.
