Abstract (en)

[origin: EP2623694A1] The assembly has a group comprising hollow and rectilinear base sections (6) equipped with electric connection units (10, 11) to transport electrical energy to electromagnet (3). A junction unit (7) is integrated in and/or cooperated with free ends of the sections for end to end connection of the sections. Another group has hollow and rectilinear base sections (8) equipped with counter plates. A fixing screw fixes the sections, and a junction unit (9) is integrated in and/or cooperated with free ends of the sections for end to end connection of the sections in extension of each other.
