Abstract (en)  
[origin: WO2012045651A1] The invention relates to a ski transport device (1) for transporting skis, comprising at least one ski holder (10) for accommodating a ski end (901) of an individual ski (90) or of a pair of skis (90), wherein each ski (90) in the ski holder (10) is oriented approximately vertically in the ski longitudinal direction (R), wherein the ski holder (10) has two retaining walls (101) which converge to some degree toward the bottom and together form an acute angle  $\alpha$ , wherein the ski holder (10) comprises a fixation element (20) which is arranged on or above upper ends (1010) of the retaining walls (101) and has fixation points (201) for engaging on various cross-section points (902) of the ski (90) or the pair of skis (90).
