Abstract (en)
[origin: WO2012045385A1] The invention relates to rail-transporting vehicle (1) for transporting rails (2), comprising a vehicle frame (3) movable on a track and having a guide channel (11) running in the longitudinal direction of the vehicle for the guided lowering of a rail (2) to be unloaded. Two fixing rollers (12) disposed opposite each other in a direction running transversely to the longitudinal direction of the vehicle are provided in the guide channel (11) and are pivotable by a drive (18) from an inoperative position (16) into an operative position (17) in which they engage the rail (2) to be unloaded.
