Abstract (en)  
[origin: CA2813670A1] The invention relates to a foundation for a wind turbine, comprising an above-ground and a below-ground part (11, 12), a connecting means (14) for a wind turbine being provided on the above-ground part (11). The invention is characterized in that the below-ground part (12) is at least partly made of a wood material.
