Abstract (en)
[origin: WO2012045965A1] The invention relates to an aircraft propulsion assembly comprising at least one nacelle (2) having at least one intermediate housing (7) and a front frame (25) that is to be mounted downstream of an outer envelope (12) of said intermediate housing (7), said front frame (25) comprising a deviation edge and at least one element forming a direct or indirect support for at least one flow deviation means (22), characterised in that the deviation edge and said support-forming element are built into the outer envelope (12) of the intermediate housing (7).
