Abstract (en)

[origin: US2012088658A1] The present invention provides a composition comprising a pesticide having a solubility in water of at most 10 g/l and a polycarboxylate ether based on a) component groups of the formula Ia and/or Ib and/or Ic as defined below, and b) component groups of the general formula II as defined below. The present invention further provides a process for producing the composition. The invention further relates to a method of controlling phytopathogenic fungi and/or unwanted plant growth and/or unwanted insect or mite infestation and/or of regulating the growth of plants, wherein the composition is allowed to act on the particular pests, the surroundings thereof or the plants to be protected from the particular pest, the soil and/or on unwanted plants and/or the crop plants and/or the surroundings thereof. The invention also relates to seed comprising the composition.
