Abstract (en)

[origin: WO2012049182A1] The invention relates to a foldable bed bathtub (1) having self-supporting walls for medical purposes, comprising a flexible foldable planar element (2), wherein the flexible folding planar element (2) defines a substantially rectangular bottom (5) and upright walls (6, 6') when the flexible folding planar element is erected and wherein the bottom (5) and the walls (6, 6') are integral when the flexible folding planar element is not erected, and wherein the bottom (5) is made of a substantially flexible material and the walls (6, 6') are made of a substantially rigid material, wherein two opposite upright walls (6) each have predetermined buckling points (9).
