Abstract (en)

[origin: CA2813683A1] The invention relates to a laminate that has at least two layers, wherein at least one layer of the laminate is a water-soluble polymer film containing active substances (= "water-soluble polymer film containing active substances"), wherein the polymer is a water-soluble polymer, and at least one second layer of the laminate is a nonwoven fabric, knitted fabric, woven fabric or a foam film (= "water retention layer") consisting of a water-soluble polymer, wherein the water-soluble polymers of the two layers are identical or different. The invention further relates to the production of such a laminate and to the use thereof.
