Abstract (en)

[origin: WO2012049399A1] The invention relates to an assembly for attaching the hangers from which an aircraft propulsion unit is suspended, which propulsion unit is intended to be suspended from a structural element of an aircraft, said propulsion unit comprising a turbojet engine having a longitudinal axis, said attachment assembly comprising at least one clevis mount (100) for attaching the hangers to a casing (120) of said propulsion unit, characterized in that the clevis mount (100) is fixed to said casing (120) by means designed to form a connection between said clevis mount (100) and said casing (120) at the external periphery of said casing (120).
