Abstract (en)
[origin: WO2012049220A1] The invention relates to a fan comprising fan blades, especially for a cooler of a motor vehicle, said fan blades (2) being fixed to a fan hub (3). In spite of being made of only a small amount of material, said fan is highly resistant to the flow conditions in the motor vehicle, each fan blade (2) being bent rearwards at an angle in the direction of a blade root (15), an angled region of the fan blade (2) being at least partially bent downwards towards the fan hub (3).
