Abstract (en)

[origin: EP2628408A2] The installation system has a functional element such as cabinet, lamp, etc., that is arranged at the structural element, in different positions. The structural element is provided with a wave-shaped geometry. The wave-shaped geometry is formed by a prism structure of the structural element. The main plane of the structural element is spanned by the extension direction of waves of the wave-shaped geometry and spacing direction of the wave-shaped geometry. The structural element is a portion of furniture element. An independent claim is included for method for moving up or changing kitchen.
