Abstract (en)
[origin: EP2628411A2] The drawer (10) has a connection element comprising a front-side mounting component that is arranged inside a front portion, and a frame-side mounting component that is arranged at a side frame (15). One of the mounting components comprises an undercut and the other mounting component comprises a projection or other portion, which engages behind the undercut in a mounted state of the front portion. The connection element comprises an adjusting element i.e. tensioning screw, by which the projection is insertable and/or fixable into the undercut.
