Abstract (en)
A waste disposal device includes a grinder tank (31) disposed within a housing (2) and having an inner rounded surface (310) angularly extending about an axis (L) for loading of kitchen waste therein, and a grinder assembly (4) rotatably mounted in the tank (31) about the axis (L) to stir and shred the waste and configured to force the waste to advance forward so that the shredding and drying process can be carried out efficiently. A condensing unit (6) is disposed to cool and condense hot air in the housing into water which is drained through a drain port (22) to thereby reduce leakage of unpleasant odor through an access opening (21) of the housing (2) .
