Abstract (en)
[origin: EP2628607A1] The element (10) has main structure (11) that is provided with recess for forming decorative pattern cavity (13). The recess is entirely filled by galvanic deposition, so as to form element structure. The fixing device is provided for fixedly securing metallic decoration of element structure. The hole of element structure is communicated with recess and is partially filled with galvanic deposition. Independent claims are included for the following: (1) a timepiece; and (2) a method for fabricating element.
