Abstract (en)

A passenger rail vehicle (10) for circulating on a rail track (12), consists of a streamlined front-end portion (14) provided with a panoramic windshield (38) providing a view on the rail track (12) in front of the passenger rail vehicle (10), a rear-end portion (18) and an intermediate portion (16) extending from the front-end portion (14) to the rear-end portion (18). The passenger rail vehicle (10) accommodates a driving cabin (25) located in the intermediate portion (16) without direct view on the track (12) and at least one passenger area (34) that extends within the front-end portion (14).
