Abstract (en)

The invention concerns a pallet and a method for assembling and disassembling a pallet (1) formed of two identical plastic material half pallet members (2, 3) to be assembled to each other in face to face relationship by interlocking snap-fit latches (4). Each half pallet comprises a first row of hollow posts (11) disposed on its first lateral side (6), a second row of support legs (9) disposed on its second lateral side (7) and a third central row of half hollow posts (12) integral with half support legs (10) disposed opposite to said half hollow posts with regard to said central axis (8) of the pallet. The snap-fit latches (4) are formed by protruding parts (14) arranged to snap in corresponding holes (15) and are easily disconnectable with a tool.
