Abstract (en)

[origin: EP2628828A1] The drafting unit (1) has pairs of input, middle and output rollers (2-4) which form delay zone and compression zone. The output upper rollers are connected to cage element (25) mounted in delivery top rollers (11u). The cage element is acted upon by a pressure element (15) in the direction of delivery lower rollers (11o). The pressure element has variable length spring element whose two ends (32,33) are pivotally supported on bearings, in longitudinal direction.
