Abstract (en)

The invention relates to a laundry treatment apparatus, in particular a dryer or a washing machine having a dryer function, comprising a control unit, a laundry treatment chamber (18) for treating laundry (19) using process air, a process air loop (20) for circulating the process air, a heat exchanger (10) arranged in the process air loop for cooling the process air, at least one liquid distributing element (42) arranged upstream the heat exchanger (10) and adapted to distribute liquid to the heat exchanger (10) for cleaning the heat exchanger, a pivot element having a pivot axis is pivotally supporting the at least one liquid distributing element (42), wherein the at least one liquid distributing element (42) is designed such that due to the rotating movement of the at least one liquid distributing element liquid is sprayed to the heat exchanger (10).
