Abstract (en)

The invention relates to a method in multiroll calender, in which method a fiber web, particularly a paper or board web (W) is calendered in a multiroll calender comprising at least two stacks of calender rolls (10, 20), each stack comprising at least two calender rolls and at least one fly roll (15, 25) and at least one of the fly rolls (25) is movable between at least two locations. The invention also relates to a multiroll calender for calendering a fiber web, particularly a paper or board web (W), which multiroll calender comprises at least two stacks of calender rolls (10, 20), each stack comprising at least two calender rolls and at least one fly roll, and at least one fly roll (25) of the multiroll calender has at least two positions of use during calendering.
