Abstract (en)

[origin: WO2012052475A1] A toy building set comprising separate building elements adapted for building a toy figure, the building elements comprising a number of body elements (1, 2, 3) that are interconnected or adapted for being interconnected by means of articulated joints, and where the toy building set also comprises a number of dressing elements (5) and means for mounting the dressing elements on the body elements. The toy building set further comprises a number of design elements (4), and the at least one design element and at the least one body element has a first type of complementary coupling means (7) adapted for releasably mounting the design element on the body element, and where at least one dressing element and the design element has a second different type of complementary coupling means (8, 9) adapted for releasably mounting a dressing element on the design element, so that it is not possible to mount the dressing element on a body element.
