Abstract (en)
[origin: WO2012052621A1] The invention relates to a carrier (1) for carrying and moving a welding torch, cutting torch or other corresponding torch (6) at a worksite, which carrier (1) comprises a frame, which is arranged movable on a base, as well as a bracket arrangement (5) of the torch (6), arranged attachably to the frame, for attaching the torch (6) detachably in the carrier (1), which bracket arrangement comprises connection means (5a) for connecting the bracket arrangement (5) to the carrier (1), attachment means (6a) for attaching the torch (6) to the bracket arrangement (5), and one or more interconnection parts (17) for interconnecting the connection means (5a) and the attachment means (6a) to each other, which attachment means (6a) can be moved in relation to the connection means (5a), as well as locking means (7a), which are functionally combined with the attachment means (6a) and which are adapted to lock the torch (6) in place in the attachment means (6a) as well as to lock the attachment means (6a) into different positions in relation to the connection means (5 a) such that the distance of the torch (6) in relation to the work subject and the position of the torch (6) in relation to the connection means can be locked in place.
