Abstract (en)

[origin: WO2012052678A1] The invention relates to a sealing member (C) intended for being mounted on an opening (31) of a fluid-product container (P), said member including; a basic body (1) forming an opening for dispensing the fluid product (17), a mounting part (20) in which the basic body (1) is received in a stationary manner, and a plugging lid (25) intended for plugging the dispensing opening (17), the lid (25) being connected to the mounting part by a hinge (26), the lid (25) and the part (20) being produced as one piece, the lid (25) being initially connected to the mounting part (20) by at least one bridge of material (28) that can break before opening the lid for the first time, characterised in that the basic body (1) lies entirely inside the mounting part (20).
