Abstract (en)

[origin: WO2012052649A1] The present invention relates to a hydraulic device (100) for changing the pitch of a propeller comprising a piston rod (20) actuated by a hydraulic fluid, said piston rod (20) comprising at its end a clevis mount (30) able to provide a connection for transmitting the movements of said piston rod (20) so as to change the pitch of at least one propeller, said hydraulic device being characterized in that it comprises a thread nut (41) held in position on said clevis (30) of said piston rod (20) by retaining means (40), said nut (41) being able to collaborate with a threaded rod in order to provide a connection.
