Abstract (en)

[origin: WO2012052498A1] The invention relates to a friction clutch or friction brake having an axially movable pressure piston assembly and at least one ring shoulder to which pressure can be applied by the pressure piston assembly. According to the invention, the pressure piston assembly comprises at least two pistons which can be applied to the at least one ring shoulder in successive order and in stages in a pressure-dependent manner. Application in agricultural machines.
