Abstract (en)

[origin: WO2012052318A1] The invention relates to a carbon brush (10) with a disconnection apparatus (20), which, in a cavity (12) in the brush body (11), has a disconnection body (21), which consists of an electrically insulating material and has a prestressed compression-spring body (24), which acts resiliently on the disconnection body (21). The compression-spring body (24) and/or the disconnection body (21) are/is formed from plastic.
