Abstract (en)

[origin: EP2630998A1] Anti-overturn device for goalposts, furniture and other similar elements, comprising, in the base (2) of the element (1) which is intended to be prevented from falling by tipping forwards, a telescopic device provided with an ejection mechanism (4), which is activated upon slightly lifting this portion, causing a support foot (3) to come out spontaneously forward, towards the front, which becomes an additional frontal foot that prevents the forward overturn of the element (1).
