Abstract (en)  
In a flaskless mold making apparatus 1 which causes electrical equipment, pneumatic equipment, and hydraulic equipment to operate by an operation of a control unit 10 included in a control panel 6, and makes a mold from molding sand, provided is an installation assist device for assisting installation thereof. The installation assist device includes a display 14 provided in the control panel 6, and for displaying characters, and a touch panel 15 for inputting a switch operation signal by an installation worker's operation. In the control unit 10, a storage unit 19 for previously storing information to display on the display 14 dialogically an installation procedure when installing the mold making apparatus 1 is provided. The control unit 10 performs control so as to display on the display 14 characters of the installation procedure read out of the storage unit 19, and proceed with installation procedures in order dialogically based on a switch input signal input from the touch panel 15.
