Abstract (en)
[origin: EP2631385A2] The device has two parallel rails (1, 2) fixed at or below a support structure (3), and a curtain (4) performing a sun protection function. Attachment elements i.e. U-shaped sliders, are fastened on bars extending transverse to an extending direction of the rails by a hook element such that the attachment elements stand in a sliding connection to the rails. Each attachment element has a U-shape with two legs, where each U-leg is provided with a fastening head at a free end. The fastening head is guided in the rails. The bars are attached to a U-bar that connects the U-legs.
