Abstract (en)

[origin: EP2631414A2] The guide rail has a guide groove profile with a rear wall and two shanks protruding from the rear wall. The guide groove profile is formed in one-piece. A support profile (100) is provided, which is fastened to a wall embrasure or to a window frame, and with which the guide groove profile is detachably connected in a mounted state. The support profile has two holding projections, which hold the guide groove profile on the support profile in a form-fit manner in the mounted state in a pulling direction. An independent claim is included for a vertical awning with two longitudinal sides.
