Abstract (en)

[origin: WO2012055524A1] The invention relates to a partition device (1) for office desks (2), comprising a holding device and a partition fitted to the holding device (3) such that it can be moved. In order to be able to adapt the partition better to the requirements of the worker with reference to visibility and light conditions or acoustics, the invention provides for the partition to have at least two partition elements (4) that can be moved relative to one another.
