Abstract (en)
  [origin: WO2012055417A1] A system for mail or packet notification, which system concerns a plurality of mail or packet boxes, which mail or packet boxes comprises mail or packet indication means. Plurality of mail or packet boxes placed locally for a number of users are supervised and the user is informed of reception of mails or packets. This can be achieved if a plurality of mail or packet indication means are connected to at least a first processor system, which processor system performs a supervision of the indication means in the packet or mail boxes, which first processor system performs transmission of mail or packet information to users related to an activated mail or packet indication means. This way persons living in a building where a number of common placed mail boxes are serviced by the mailman who will then send a message to each of the users who have received a mail.
