Abstract (en)
[origin: WO2012056100A1] The object of the invention is a column shoe for securing steel concrete columns to a base. The column shoe (1) comprises a bolt housing (4), which comprises a baseplate (6) provided with a bolt hole (5), and an sideplate (7), and main attachment units (8) connected to the bolt housing (4) for securing the column shoe (1) and the steel concrete column (2) together. The bolt housing (4) is fabricated by casting such that the bolt housing (4) comprises a single-piece casting (9) comprising a baseplate (6) and a sideplate (7).
