Abstract (en)
[origin: WO2012050518A1] A device for holding one long side of a roll up fabric track, comprising side elements enclosing an inner holder rail which comprises a grip opening to hold elongated fasteners arranged along each of the fabric track's long sides, where the device further comprises spring elements arranged so that in a position, when a fabric track is held in said holder rail, they are able to act on the holder rail in a direction towards said side elements to keep the fabric track in place, whereby said spring elements and said inner holder rail are integrated into one and the same piece.
