Abstract (en)
[origin: WO2012055623A1] The present invention relates to a sealing plug designed to equip a ventilation outlet of a sealed casing (2) of an electronic equipment item, in particular of a gear reduction unit for a wiper motor intended for wiping a glazed surface of a motor vehicle, the ventilation outlet being formed by a cylindrical or frustoconical barrel (1) integrally moulded with the casing (2), said plug comprising at least one support sleeve (3) designed to be force-fitted into the barrel (1), and a cap (4) designed to cover the upper portion of said barrel (1), said cap (4) comprising a male insert (42) designed to be force-fitted into the support sleeve (3) and to engage with the support sleeve (3) so as to allow the air to circulate between the interior and the exterior of the casing through said barrel (1). According to the invention, the support sleeve (3) and the cap (4) form part of a single component comprising a flexible tongue (6) connecting the support sleeve (3) and the cap (4), the flexible tongue being able to be folded over so as to allow the cap (4) to be placed in position on the support sleeve (3).
