Abstract (en)
[origin: EP2633954A2] The screwdriver has a shaft (21) including a rear end region rotationally rigidly anchored in a handle (1). The shaft includes a front profile head (22) adapted to a profiling of an engaging region of a screw. Bushing parts (3, 5), an elastic part (4) and a front insulating sleeve part (6) surround the shaft. A head part is arranged at a front end of the front insulating sleeve part. The head part includes a sidewardly opened opening, and a center, slot-like sidewardly opened opening at a front wall. A front end part of the shaft forming the profile head projects through the openings. The handle is made of an electrically insulating material i.e. plastic. The shaft is made of metal.
