Abstract (en)
[origin: DE102013100201A1] The gutter has an insert (7) comprising a collecting channel (8), where the channel has a passage opening for supplying discharged water to the gutter. A discharge opening is larger than the passage opening in a longitudinal direction and/or a transverse direction. The insert has a flat part as a base part, and wall parts running perpendicular to the base part extend from the base part. Length and/or breadth of the insert correspond to a free inner length and/or breadth of the gutter. A tile layer is arranged below an intermediate layer of a tile adhesive layer. An independent claim is also included for a shower base element.
