Abstract (en)

[origin: EP2634347A1] The glass holder has base structure with connecting unit for connection to the profile assembly. A holder for connection to the surface element is provided. The base structure consists of lower portion and upper portion (22). The connecting unit is formed of sections of lower and upper portions. The lower and upper portions are completely designed as sheet-metal portions and are arranged partially in overlapping position in mounted state. Independent claims are included for the following: (1) profile arrangement; and (2) wing frame structure.
