Abstract (en)
[origin: US2013173068A1] A showcase control system 100 comprises a showcase operating rate detection unit 11 that detects a showcase operating rate of a showcase control unit 30 which controls freezing or refrigerating inside a showcase, an over-operating detection unit 12 that outputs an over-operating signal when the showcase operating rate input from the showcase operating rate detection unit 11 exceeds a predetermined value, and an air-conditioning control system 20 that curtails the energy-saving control of an air conditioner 50 when receiving an over-operating signal from the over-operating detection unit 12. Thereby, it is possible to comprehensively perform energy-saving control of a showcase and an air conditioner at a sales space where the showcase is installed.
