Abstract (en)

[origin: EP2518432A1] The firearms target device has an image capturing device (10), a distance measuring device (12), and inertial measurement unit along with a control computer and an image display device. A projectile has a leading barrel (20) and a target device (1), where the control computer is designed for displaying one of the images of the image capturing device received from image capturing device of a target object at an image display device. The image of the target object is covered with a sighting mark. An independent claim is also included for a method for aligning a fire arm equipped with a firearm-target device.
