Abstract (en)  
Described is a products automatic vending machine comprising a support structure (2), a plurality of shelves (6) arranged one over the other in the support structure (2), a pull-out door (11) for collecting the products fallen from the shelves (6), a lift (8) vertically movable in a hollow space (7) delimited between the shelves (6) and a partially transparent front wall (5) of the support structure (2). The lift (8) is adjustable in a configuration for collecting the products, in which it delimits internally a collecting compartment (21) closed downwards and open upwards, a configuration for releasing the collected products, wherein it is open downwards and towards the pull-out door (11), and a collapsed and substantially flattened configuration, in such a way as to obstruct as little as possible the viewing of the products on offer.
