Abstract (en)

[origin: EP2634784A1] The housing (3) has a switching element (2) provided with portions for switching electrical contacts. A hollow portion (4) is provided to receive the switching element. Fixing elements (5a1, 5a2, 5b1, 5b2) are provided to fix hollow portion to a support (6). The fixing elements are provided with fixing unit comprising a surface bearing on the support. A connection unit (51) is allowed to connect the fixing unit to the hollow portion and is designed to deform in flexion along principal direction (D2). Independent claims are included for the following: (1) an electromagnetic relay; (2) a switching assembly; and (3) an assembly for supporting an electromagnetic relay.
